

Bronneberg Recycling A-600E Alligator Shear

The A-600E alligator shear is fitted with a hydraulic hold-down. The protected shear head is operated by a foot pedal for single or continuous cutting.

If the shear is to be subjected to extra heavy loading, a heavy duty version is available which has a larger oil tank and oil cooling.

- Designed for the cutting of aluminium and ingot additions.
- Equipped with a safety table.
- Ideal for cutting all oversized materials.
